

A network cable is coiled into a spiral shape against a solid purple background. The cable is silver with a green RJ45 connector at the end.

Network cabling for the future

A close-up photograph of a telephone and a network switch. The telephone is on the left, showing a screen and buttons. The network switch is on the right, showing ports and a fan.

Voice and data solutions

In a world where information is the most important commodity, a fast, efficient and reliable cabled communication network is essential.

Ardent apc has a wealth of experience in designing and installing networks that fit into all types of environments and locations. From a large campus, an industrial complex, a small industrial unit, a modern office suite or a home worker, a retail centre to a small high street outlet, we can provide a complete cabling solution that will ensure you are connected to all the information your business requires.

About us

Ardent apc has been installing, designing, commissioning and maintaining high performance cabled network infrastructures for voice and data since 1999. Our engineers have over 50 years of cabling installation experience between them and we operate an on-going training partnership with our main suppliers Siemon.

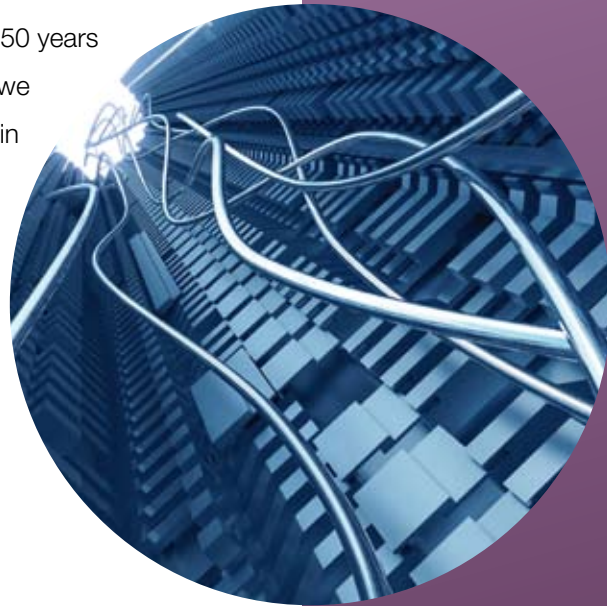

Our client list is always growing and includes multinational blue chip companies, NHS and public sector, pharmaceutical, manufacturing, finance, retail and the service industries.

By understanding our customers and their business needs, we offer a complete solution that fulfils your business requirements today and in the future.

Our services and products include:

- Data Cabling - Cat5e, Cat6, Cat6a, Cat7
- Fibre Optic
- Voice and Communication Cabling
- Small Home and Office Networks
- Audio and Video System Solutions
- Maintenance and support
- Network audits
- Moves, additions or changes to your existing network

Contact us now to discuss your cabling and communication requirements.
