

Two network cables are shown against a solid orange background. The top cable is white with a clear RJ45 connector, and the bottom cable is black with a black RJ45 connector. Both cables are coiled into a shape that resembles a heart or a stylized 'A'.

Keeping your IT systems on target.

A close-up photograph of a VoIP phone and a network switch. The phone is on the left, showing its screen and buttons. The network switch is on the right, showing its ports and a fan. The text 'Voice and data solutions' is overlaid on the bottom of the image.

Voice and data solutions

Ardent IT is a dynamic company offering a fresh approach to providing the best IT System, Design, Installation, Networking, Consultancy and Support for your business.

We deliver reliable, scalable, and dynamic IT solutions to businesses located in the south east at a fixed cost.

By fully understanding our clients' needs we ensure that we provide the best services to each client with a unique, practical and tailored solution.

About us

Ardent IT has over 10 years experience in the IT and Networking environment with qualifications ranging from Microsoft to Cisco. We take the time to understand your business requirements and deliver 'No Nonsense' technical advice for your organisation.

Our core strength is advising businesses on the best strategies to get the most out of their IT infrastructure to further enhance their business processes. We pride ourselves on offering advice and strategies that include closed and open source solutions to suit the needs of the business.

Ardent IT delivers IT support for your desktops, servers, applications and other equipment. If your business heavily relies on the IT infrastructure in place then you need an experienced IT company that is able to deliver corporate grade IT support and advice.

Our services include:

- Auditing
- Consulting
- System design
- Installation
- Procurement
- Systems maintenance
- Outsourcing
- Training
- Onsite support
- End user Helpdesk
- Business Continuity Planning
